

AI AND AUTOMATION

AI for Boards and Supervisory Boards

DURATION

Half day

AUDIENCE

Board

LANGUAGE

Polish or English

FORMAT

On site or online

A strategic session, not a technical one: what AI actually changes in your business model, where the risks sit (legal, reputational, operational) and which questions a board should be asking management. Discussion built on cases from the participants' industry.

WHAT WE COVER

- What AI changes and what it does not: separating durable shifts from vendor noise
- Your business model under pressure: where value moves in your industry and what that means for you
- The risk map: legal, reputational and operational exposure, including what your people already do with AI
- The EU AI Act: what applies to your organisation, the timeline and the duties a board cannot delegate
- Governance: the questions a board should ask management, and the answers that should worry you
- Investment logic: how to judge AI initiatives without becoming a technical expert

YOU LEAVE WITH

- A question set for your next board meeting, grounded in your own industry cases
- A one-page risk map template for AI exposure, including your duties under the EU AI Act
- A shared vocabulary that lets the board and management talk about AI without translation

WHO IT IS FOR

Management board members, supervisory board members and owners. Small groups, closed format, discussion based on cases from the participants' industry.

BOOK THIS TRAINING

Write to michal.krauze@krauzeadvisory.com with the subject "Training: AI for Boards and Supervisory Boards". Add preferred dates and group size. Closed programs are tailored to your organisation.
